Roof-mounted low-cost solar hot water systems designed for Australian conditions

The Envirosun® TS Range is a roof-mounted thermosiphon solar hot water system, available in two sizes: TS170 for small households, TS300 for average–large. Fully equipped and ready to install.

Envirosun is part of Energie Group Australia - the country's leading independent hot water brand that's been a major part of Australia's hot water story for nearly three decades. A true blue, locally owned company that designs and builds serious hot water technology for Australian conditions - and stands behind every system with an industry-leading 10-year warranty.

There have been 300,000+ hot water systems sold by EGA and growing in Australia and across 15 countries worldwide.

Premium Stainless Steel Tank - Grade 444 Ferritic Steel, manufactured in Holland. Assembled, tested and certified in Victoria, Australia.

Peak Performance Solar Collectors - Laser-welded copper risers, tempered solar glass, high-performance selective surface. Maximum output year-round.

Complete System Solution - Every component included.
No missing parts, no last-minute sourcing. Just install and go.

No Pump Required - Thermosiphon flow works purely on natural convection.
No running costs, no moving parts, no maintenance headaches.

Electric or Gas Booster - Reliable backup on low-sun days. Available in electric or gas-boosted models.

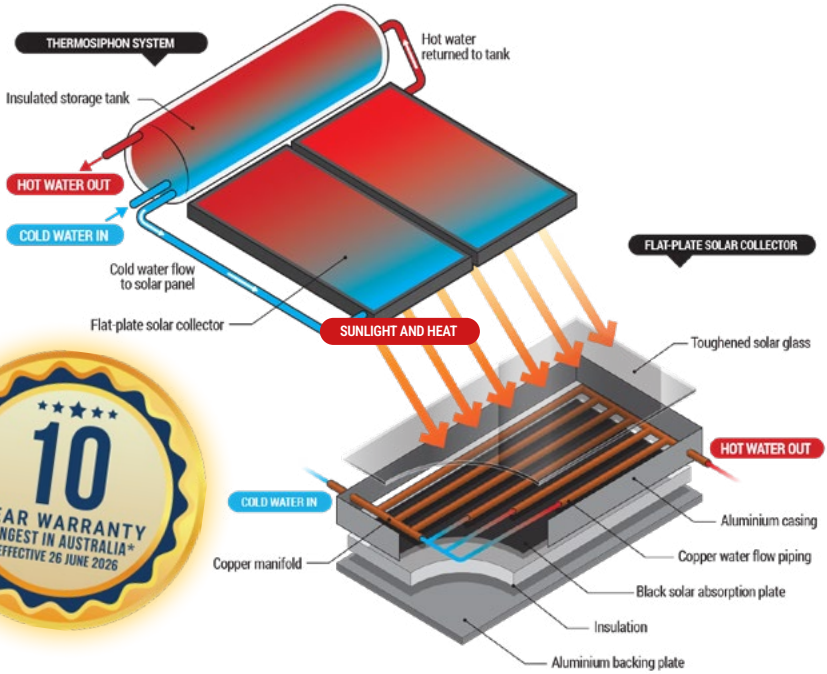

Eligible for Government Incentives - CER registered and STC eligible.* Helps reduce the upfront cost in every state and territory.

More panel, more power - solar panels are available in two different sizes; the 2HS panel is 2m² and the 25HS panel is 2.5m² in size, giving you a solar collection area of 4m² and a whopping 5m² respectively, 20% larger than most other brands for solar hot water systems on the market.

**STC eligibility subject to installation date and location. Check eligibility at cleanenergyregulator.gov.au*

Efficient, cost-saving, future-proof.

Envirosun®'s Thermosiphon System (TS Plus) is one of the most advanced solar hot water systems available in today's market, offering extremely high efficiency and a cost-effective solution for every home.

The longest hot water system warranty in Australia.

TANK	10 years warranty	2 years labour
COLLECTOR	10 years warranty	2 years labour
EXPANSION VESSEL (THX ONLY) * *	2 years warranty	2 years labour
ELECTRICAL, VALVES & ACCESSORIES	1 year warranty	1 year labour

ENVIROSUN WARRANTIES *Effective from 26 June 2026. For units purchased before that date please contact us for details.*

Original invoice as proof of purchase required for all warranty claims.

RESIDENTIAL CUSTOMERS *Original owner/occupier: 10-year product and 2-year labour warranty.*

All subsequent owners: 5-year product warranty and 2 years labour warranty.

COMMERCIAL & NON-RESIDENTIAL CUSTOMERS *3-year product and 1-year labour warranty*

Evidence of service record by qualified plumber or hot water service provider is required.

10-year warranty requires system service at 5-year interval post installation date for anodes and valve replacements as part of general service conditions.

**Except Vic under VEEC program - 5-year warranty, refer to owner's manual*

** * Only THX (closed circuit) models are suitable and warranted for frost-prone areas.*

CER code	TS300/40/O/GR26/S2/E20HS	TS300/60/O/GR26/S2/E20HS

Frost country or tough water conditions? THX is here.

The Envirosun® THX Range is a closed-circuit thermosiphon solar hot water system built for conditions where standard open-circuit systems fall short: frost-prone regions and poor water quality.

Two models: THX300/40Se (electric boosted) and THX300/40Sg (gas boosted). Supplied as a complete system, ready to install. Same thermosiphon simplicity engineered for harsher conditions. Made in Europe, designed, assembled and tested in Australia.

Built-in Glycol freeze protection – cannot be damaged by frost

When temperatures drop below freezing, the glycol doesn't expand and damage the system. It shifts into a protective gel-like state instead. No cracking. No failure. As temperatures rise, it returns to liquid form and normal operation. This isn't an add-on - it's engineered into the system.

Hard water, bore water, corrosive water – not a problem

Because household water never enters the collectors, water quality can't degrade system performance. Hard water, bore water, corrosive supply - none of it reaches the collector loop. Ideal for alpine regions and equally suited to any installation where water quality is a concern.

Installs the same way. No extra complexity.

The THX installs just like the TS Range - same process, same simplicity. Each system comes complete with all valves, thermostat, fixings and booster required. The food-grade glycol is sealed within the system, certified safe, and never contacts the household water supply.

No pump. No power. Just hot water for less.

With Thermosiphon technology, hot water rises naturally from the solar collectors to the storage tank — driven entirely by the difference in water density, not electricity; zero power required. Lower running cost, fewer parts, less maintenance.

Where the THX is the right specification:

Alpine Victoria · Tasmania · ACT · Southern Victoria · Parts of regional NSW and SA · Any region with hard, bore or corrosive waterAlpine Victoria · Tasmania · ACT · Southern Victoria · Parts of regional NSW and SA · Any region with hard, bore or corrosive water

Built for Australia's toughest conditions.

Backed by its best warranty.

BUILT FOR AUSTRALIAN CONDITIONS
Made in Europe, designed, assembled and tested in Australia. Water tank premium Grade 444 ferritic stainless steel for outstanding corrosion resistance. Backed by Envirosun 10-year warranty.

COLLECTORS BUILT TO PERFORM
Our solar collectors feature a high-performance absorber panel, laser-welded to copper risers for optimal heat transfer. Protected by tempered glass and weather-resistant aluminium for all conditions.

PREMIUM STAINLESS STEEL TANK
Grade 444 Ferritic Steel, manufactured in Holland. Assembled, tested and certified in Victoria, Australia.
